SOFT STONE

Soft stone, *a real stone surface that bends*

Flexible stone panels for interior and exterior walls: a textured mineral surface on a flexible MCM body with a fibreglass mesh backing. 2 to 10 mm thick, bends to a 300 mm diameter, cuts with a knife. Travertine and granite collections, 16 colours.

INTERIOR AND EXTERIOR WALLS | COLOUR BOX PACKING | ISSUED 24 OCT 2026

What soft stone is

A thin, flexible panel with the look and texture of cut stone. The surface is a textured mineral layer; the body is a flexible modified clay material (MCM); the back is a fibreglass mesh. The panel bends around columns and curved walls, is cut to size on site with a knife, and weighs a fraction of stone.

PRODUCT

Flexible stone panel: textured mineral surface, flexible MCM body, fibreglass mesh backing

BENDING

Minimum bending diameter approx. 300 mm

APPLICATION

Interior and exterior wall cladding, including curved surfaces

PACKING

Colour box packing

Ask for a quotation

Send us the panel, colours, sizes and quantities you need and we will confirm availability and send your quotation.

Samples of any colour can be arranged. For a curved wall, tell us the radius and we will confirm the panel thickness to use.
