DALLES DE VERSAILLES PANELS

Thermally modified wood

Thermally modified wood in thin 8/2 and 10/2 constructions, in oak, walnut and maple, and in maple for indoor flooring and outdoor decking. The surface carries a water-repellent coating and the tongue and groove is wax-sealed on all four sides, to keep spills on the surface.

SIZE (MM)	CONSTRUCTION	GRADE
1900 x 125	8/2, 10/2	ABCD
1900 x 190	8/2, 10/2	ABCD

The coating keeps everyday spills on the surface. It does not protect against flooding, leaks or moisture from the subfloor. Care and cleaning instructions are supplied with the floor.

Chevron panels in two grades, and block flooring.

Left: chevron panels, grade AB (left half) and grade CD (right half). Right: block flooring, squares made of short strips.
